Psychiatric treatment with Parkinsonism side effects

From: nicho.grech@gmail.com

To: president@maltaparkinsons.com, secretary@maltaparkinsons.com, info@maltaparkinsons.com

In your mission to support people suffering from Parkinson disease, do you justify the diabolic treatment of Psychiatry which makes patients sick with Parkinsonism, as likely as more than 1 every 10 persons? Would you fight to ban and outlaw once forever such barbaric treatment? Or maybe patients that happen to be labelled as mental do not have the same dignity as other patients? Would you ever justify that say as an example, to appear to cure one suffering from asthma, is fine to at the same time make him sick with Aids? What sadistic logic in your opinion lies behind and could ever justify the approval of such diabolic medicines? See link to a webpage on the matter from my website (<https://tinyurl.com/yckkt3uk>)
